The Berkshire Conservation Agent Program has been a great help to the West Stockbridge Conservation Commission this past year. As our hired expert the BCAP person has been able to clarify issues when dealing with a large commercial enterprise helping to bring it into dialog with the town and verifying vegetation limits in another wetlands issue. For a small town such as West Stockbridge the program gives us the information and experience to comply with Commonwealth regulations. I highly endorse the Conservation Agent Program and hope that funding to continue will be granted. John Masiero, co-chair West Stockbridge Conservation Commission
