Subject: Water Protection Grant Request

I am writing to request that you approve CET's funding request for water protection initiatives. This is critically important work, funding for such activities is painfully limited, and you must therefore make resource allocation decisions carefully. CET has an unparalleled track record in the Berkshires for successful design and implementation of programs that protect the environment. They are an excellent candidate to receive funding to administer programs that will help keep toxic chemicals out of our ground and river waters. I am very impressed with their energy, solid waste handling, and various educational programs. I think that you will get great value from your money spent by approving CET's grant request.
