Subject: Re: Project Native support letter

This is a letter in support of the grant that is under consideration for Project Native to help restore the Housatonic River floodplain and forest.

We support wholeheartedly and believe in the work of Project Native.

On a small scale, Project Native has helped us restore the property around our new home after construction left the landscape torn up and virtually barren. We can only imagine the restoration work that they could do on a large scale with your support.

Sincerely,
Nina and John Lipkowitz
Great Barrington, MA
